What is Grav?

BUILD **FASTER** WEBSITES

GRAV IS A MODERN OPEN SOURCE FLAT-FILE CMS

GET GRAV

STABLE VERSION **1.4.3** **NEW!** UPDATED **3 WEEKS AGO** • [CHANGELOG](#)

WHY CHOOSE GRAV?

Voted "Best Open
Source CMS" in
2016

Voted "Best Flat
File CMS" in 2017

Fast

Extensible

Open Source

Performance is not just an
afterthought, we baked it in from
the start

Grav has a powerful API and
sophisticated Package Manager to
make it super flexible

[GitPitch @ github.com/hibbitts-design/gitpitch]

Grav is Open Source, and all the
code is available on [GitHub.com](https://github.com)

Grav Highlights

- File-based
 - Fast performance (esp. smaller sites), simplicity, portability and generally more secure
 - File-based content also naturally supports version control
 - Grav can also be a front-end for any collaborative Git repository
- Markdown
 - A platform-independent format perfect for writing and the 5Rs

Grav Highlights

- Modular
 - Modular content is possible, along with custom content types
- Workflow
 - Supports an efficient edit and publish workflow (esp. Git-based)
- Customization
 - Powerful Blueprints supports Admin Panel customizations

Grav's Layered Conceptual Design

Open Course Hub Project

Grav Open Course Hub

Built using Grav, Open Course Hub with Git Sync is designed to give tech-savvy educators an open, collaborative and flexible platform that they can partner with their current LMS

Grav Open Course Hub

- Streamlined setup and configuration (incl. Git Sync)
- Supports open and collaborative content (via Git repository)
- Theme files synced to Git repository for collaborative authoring/assistance
- Example course hubs (incl. basic, intermediate. and advanced)
- Includes custom content type pages and Shortcodes (i.e. Embed.ly Web page preview cards, H5P and Swipe)
- Fully customizable Sidebar using Markdown or HTML

📖 UXMATTERS

An Overview of Expert Heuristic Evaluations

When experts conduct heuristic evaluations ... they do not usually attempt to map user interface problems directly to specific heuristics because the mapping of problems to heuristics is typically many-to-many, convoluted, and multidimensional. When experts conduct heuristic evaluations-particularly outside academic contexts-they do not usually attempt to map user interface problems directly to specific heuristics because the mapping of problems to heuristics is typically many-to-many, convoluted, and multidimensional.

What Skills are Required?

- Intended for “Tech-savvy” educators:
 - Code editor usage (e.g. Atom or Brackets)
 - Markdown or HTML basics
 - Understanding folder hierarchies (i.e. relative links)
 - Web server access
 - GitHub working knowledge (recommended)

Grav Open Course Hub is Intended for Tech-savvy Educators who Value:

- Controllability
- Flexibility
- Portability
- Efficiency
- Openness
- Participation

Grav Open Course Hub, Web install with automatic 2-way Git Sync.

Course Participants

Grav Open Course Hub Site

Git Service (i.e. GitHub)

Course Facilitator

Problems the Course Hub Tackles

 **Want a User Quote?** 

“The Open Course Hub was easy to set up and get running and my students loved having a one-stop place to go to for their course content. I really love that it syncs with GitHub so easily and seamlessly. I was able to have an open, collaborative, easily updatable, fully version-controlled site up and running in little time, with fairly modest technical skills. On the student side, it is all beautiful and easy to use on any device!”

— Mark Coster (Associate Professor at Griffith University, Australia)

Enough Talk, Demo Time!

demo.hibbittsdesign.org/cmpt-363-173/

How about *Inside* of an LMS?

canvas.sfu.ca/courses/38847

 **Time for a Student Quote!** 

“The 363 Canvas course website does an excellent job of presenting only the current week’s relevant assignments and readings on the Home page. This makes using the site a breeze because no time is required to actually navigate the site – all the important stuff is there in one click!”

*— SFU CMPT-363 Student, Using Canvas LMS
partnered with Open Course Hub*

How About Other Open-related Grav Projects?

More Open-related Grav Projects
